Mukachevo, Ukraine

LinkedIn · serhiiprokhvatylo.com

Product designer with 5+ years of experience across mobile apps, web platforms, and complex products. I turn unclear, technical problems into clear, simple, usable products — owning the work from research to launch.

Experience

Awesomic

2021 – Present

Remote

Product Designer

Embedded as the sole designer on client products, partnering with each team's PMs, engineers, and marketers from concept to launch.

Down Dating — dating app, full redesign

- Took over a product with mismatched screen styles, no design system, and an illogical task structure.
- Rebuilt it around a new brand and visual direction: created a design system from scratch, redesigned every screen, and reworked the onboarding flow and the core card-swipe experience.
- The redesign improved conversion, attracted new users, and helped balance the app's male-to-female audience.

Vera Health — AI assistant for medical professionals

- Joined a developer-built product styled only with off-the-shelf component libraries, and defined its visual identity and design system from the ground up.
- Designed entirely new screens and features as the product evolved, shaping a clear, trustworthy interface for clinicians.
- Supported the startup's growth with marketing assets — ad creatives and banners — to help attract new clients.

Powerhouse

2024 – 2025

Remote

Product Designer

- Designed an AI-powered CRM for legal teams that automates document-heavy workflows — turned a complex, document-centric process into a structured, usable product.
- Drove the design end-to-end as the only designer, collaborating with PMs and engineers through staging and launch.

Logolivery

2022 – 2024

Remote

Digital Designer

- Designed a complete cryptocurrency exchange — native app and marketing website — covering onboarding, wallet, and trading flows.
- Owned the full design process solo: competitor analysis, concepts, and handoff to a launched product.

Freelance

2020 – 2021

Mukachevo, Ukraine

Designer

- Began design self-taught — learned Figma and fundamentals, then took on first commercial clients.
